Subject: Legislation for geothermal development

Dear Legislators,

Boulder Hot Springs supports funding for the project application to do more geothermal development. There are many Hot Springs businesses and much geothermal activity in the state of Montana. Assistance in development of these natural resources could benefit the state, tourism and the individual businesses.

I participate with the operations of Boulder Hot Springs and our facility could benefit from further assistance to develop new uses for our geothermal waters.

Thank you for your support of this legislation.

Sincerely,

Barb Reiter

Director of Public Relations and Former General Manager
